[priložnost] **ITHUBA** [opportunity]

projekti FH Kärnten, ljubljanske Fakultete za arhitekturo in buildCollective v Afriki
projects of FH Kärnten, Ljubljana Faculty of Architecture and buildCollective in Africa

2. november - 4. december 2015

Razstavišči: Fakulteta za arhitekturo, galerija Dessa
Locations: Faculty of Architecture, gallery Dessa

[priložnost] **ITHUBA** [opportunity]

ITHUBA: zulujska beseda za priložnost

Ithuba je ime šol, ki so jih v revnih predelih Južnoafriške republike zgradile skupine avstrijskih, nemških, slovenskih in švicarskih študentov in mentorjev v sodelovanju z lokalnimi prebivalci: 'Ithuba Community College' je bila zgrajena med leti 2007-13 v enem od barakarskih predmestij Johannesburga, od leta 2010 pa se gradi podružnica Mzamba na Wild Coastu ob Indijskem oceanu. Obe šoli sta namenjeni otrokom, ki odrasčajo v revščini in pomanjkanju barakarskih naselij, brez pravih možnosti za poklic in dostojno življenje v prihodnosti.

Ithuba je hkrati smoter vseh socialnih projektov – gradnje šol in drugih družbenih stavb ter infrastrukturnih objektov, ki jih v Afriki gradijo fundacija S²ARCH, evropske arhitekturne šole in kolektiv buildCollective. Projekti so, globalno gledano, majhen doprinos k uresničevanju ciljev Milenijske deklaracije OZN, a velikega pomena za prihodnost nekaj sto afriških otrok in drugih prebivalcev.

Razstava je nastala v sodelovanju FH Kärnten iz Avstrije in Fakultete za arhitekturo Univerze v Ljubljani ter predstavlja načrtovanje in izgradnjo stavb koroških in ljubljanskih študentov arhitekture v obeh kompleksih Ithube, postavitve mostu preko reke Mzamba ob Ithubi na Wild Coastu, ter socialne projekte avstrijskega arhitekturnega kolektiva buildCollective v Južnoafriški republiki in Tanzaniji.

ITHUBA: a Zulu word for opportunity

***Ithuba** is a name of the schools built in poor areas of South Africa by Austrian, German, Slovene and Swiss students of architecture in cooperation with local people: 'Ithuba Community College' in the townships of Johannesburg (2007-13) and its subsidiary Mzamba on Wild Coast (from 2010 on). Both schools are intended for children who grow up in poverty and scarcity of townships with small chances for a good profession and decent life in the future.*

***Ithuba** is also an aim of social projects – construction of schools, community centers – of S²ARCH foundation, European schools of architecture and architectural team buildCollective in Africa. The projects are, globally speaking, a small contribution to achieving the goals of the UN Millennium Declaration, but of great importance for the future of some hundreds of African children and other people.*

The exhibition is created in collaboration of FH Kärnten from Austria and Faculty of Architecture, University of Ljubljana from Slovenia. It presents projects of Carinthian and Slovene students in both Ithuba schools, construction of the bridge over Mzamba River on Wild Coast and projects of architectural collective buildCollective in South Africa and Tanzania.

2009, FH Kärnten: Ithuba Skills College,
Johannesburg, Republic of South Africa
Schap! Delavnica in učilnica *Workshop and Classroom*

2011, FH Kärnten: Ithuba Primary School,
Johannesburg, Republic of South Africa
